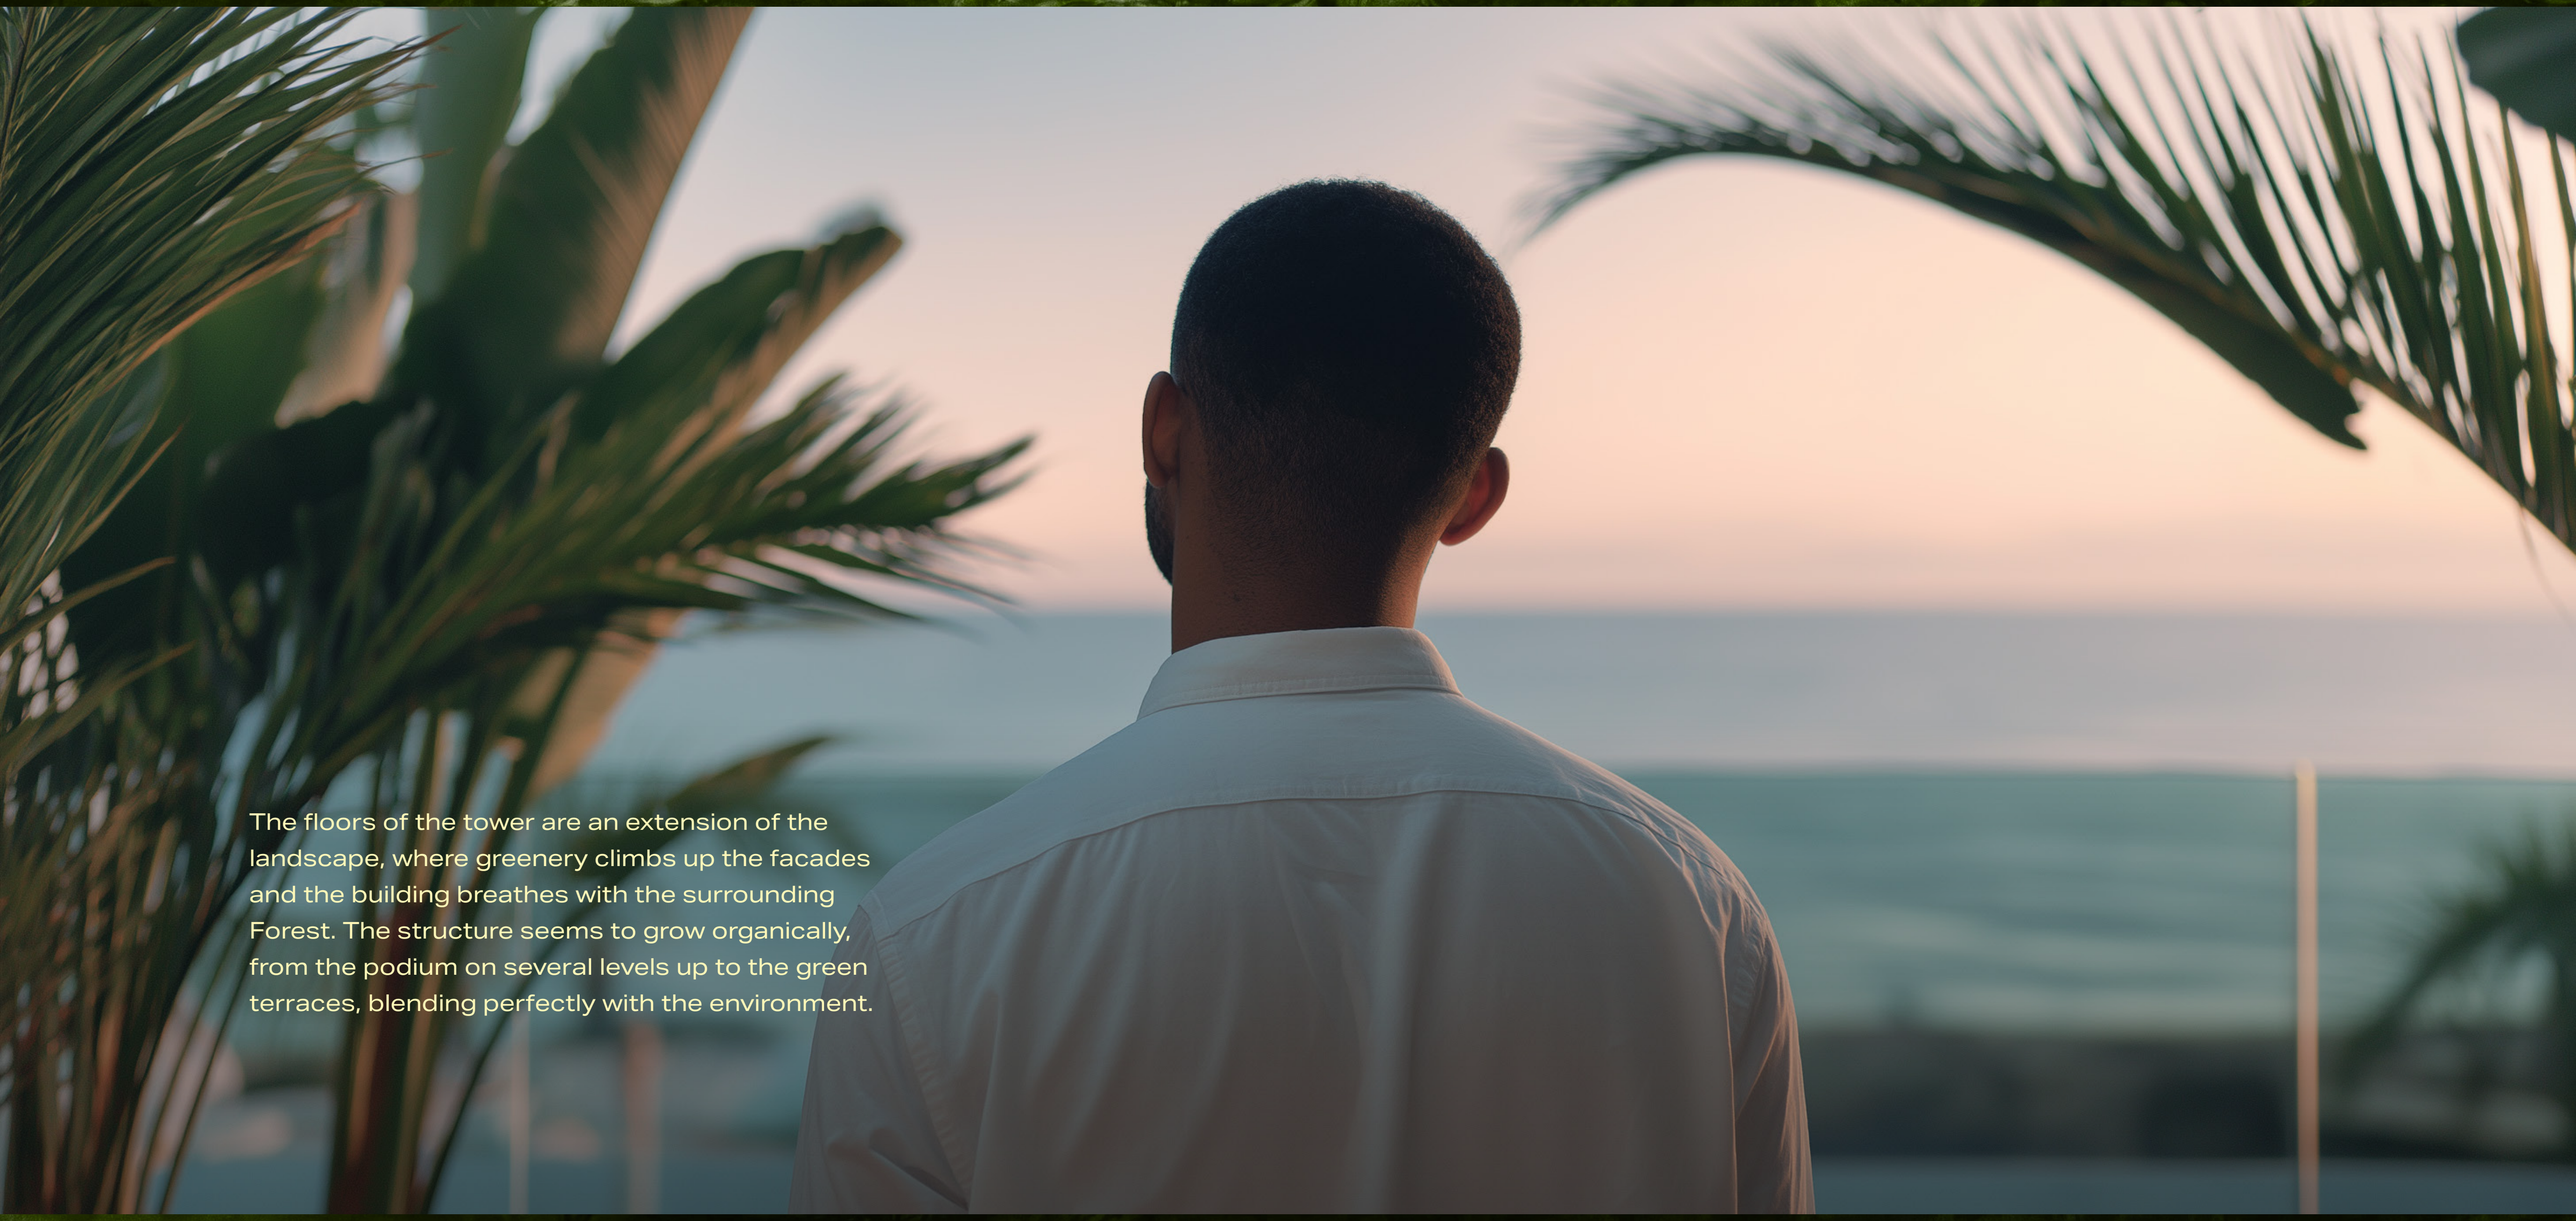
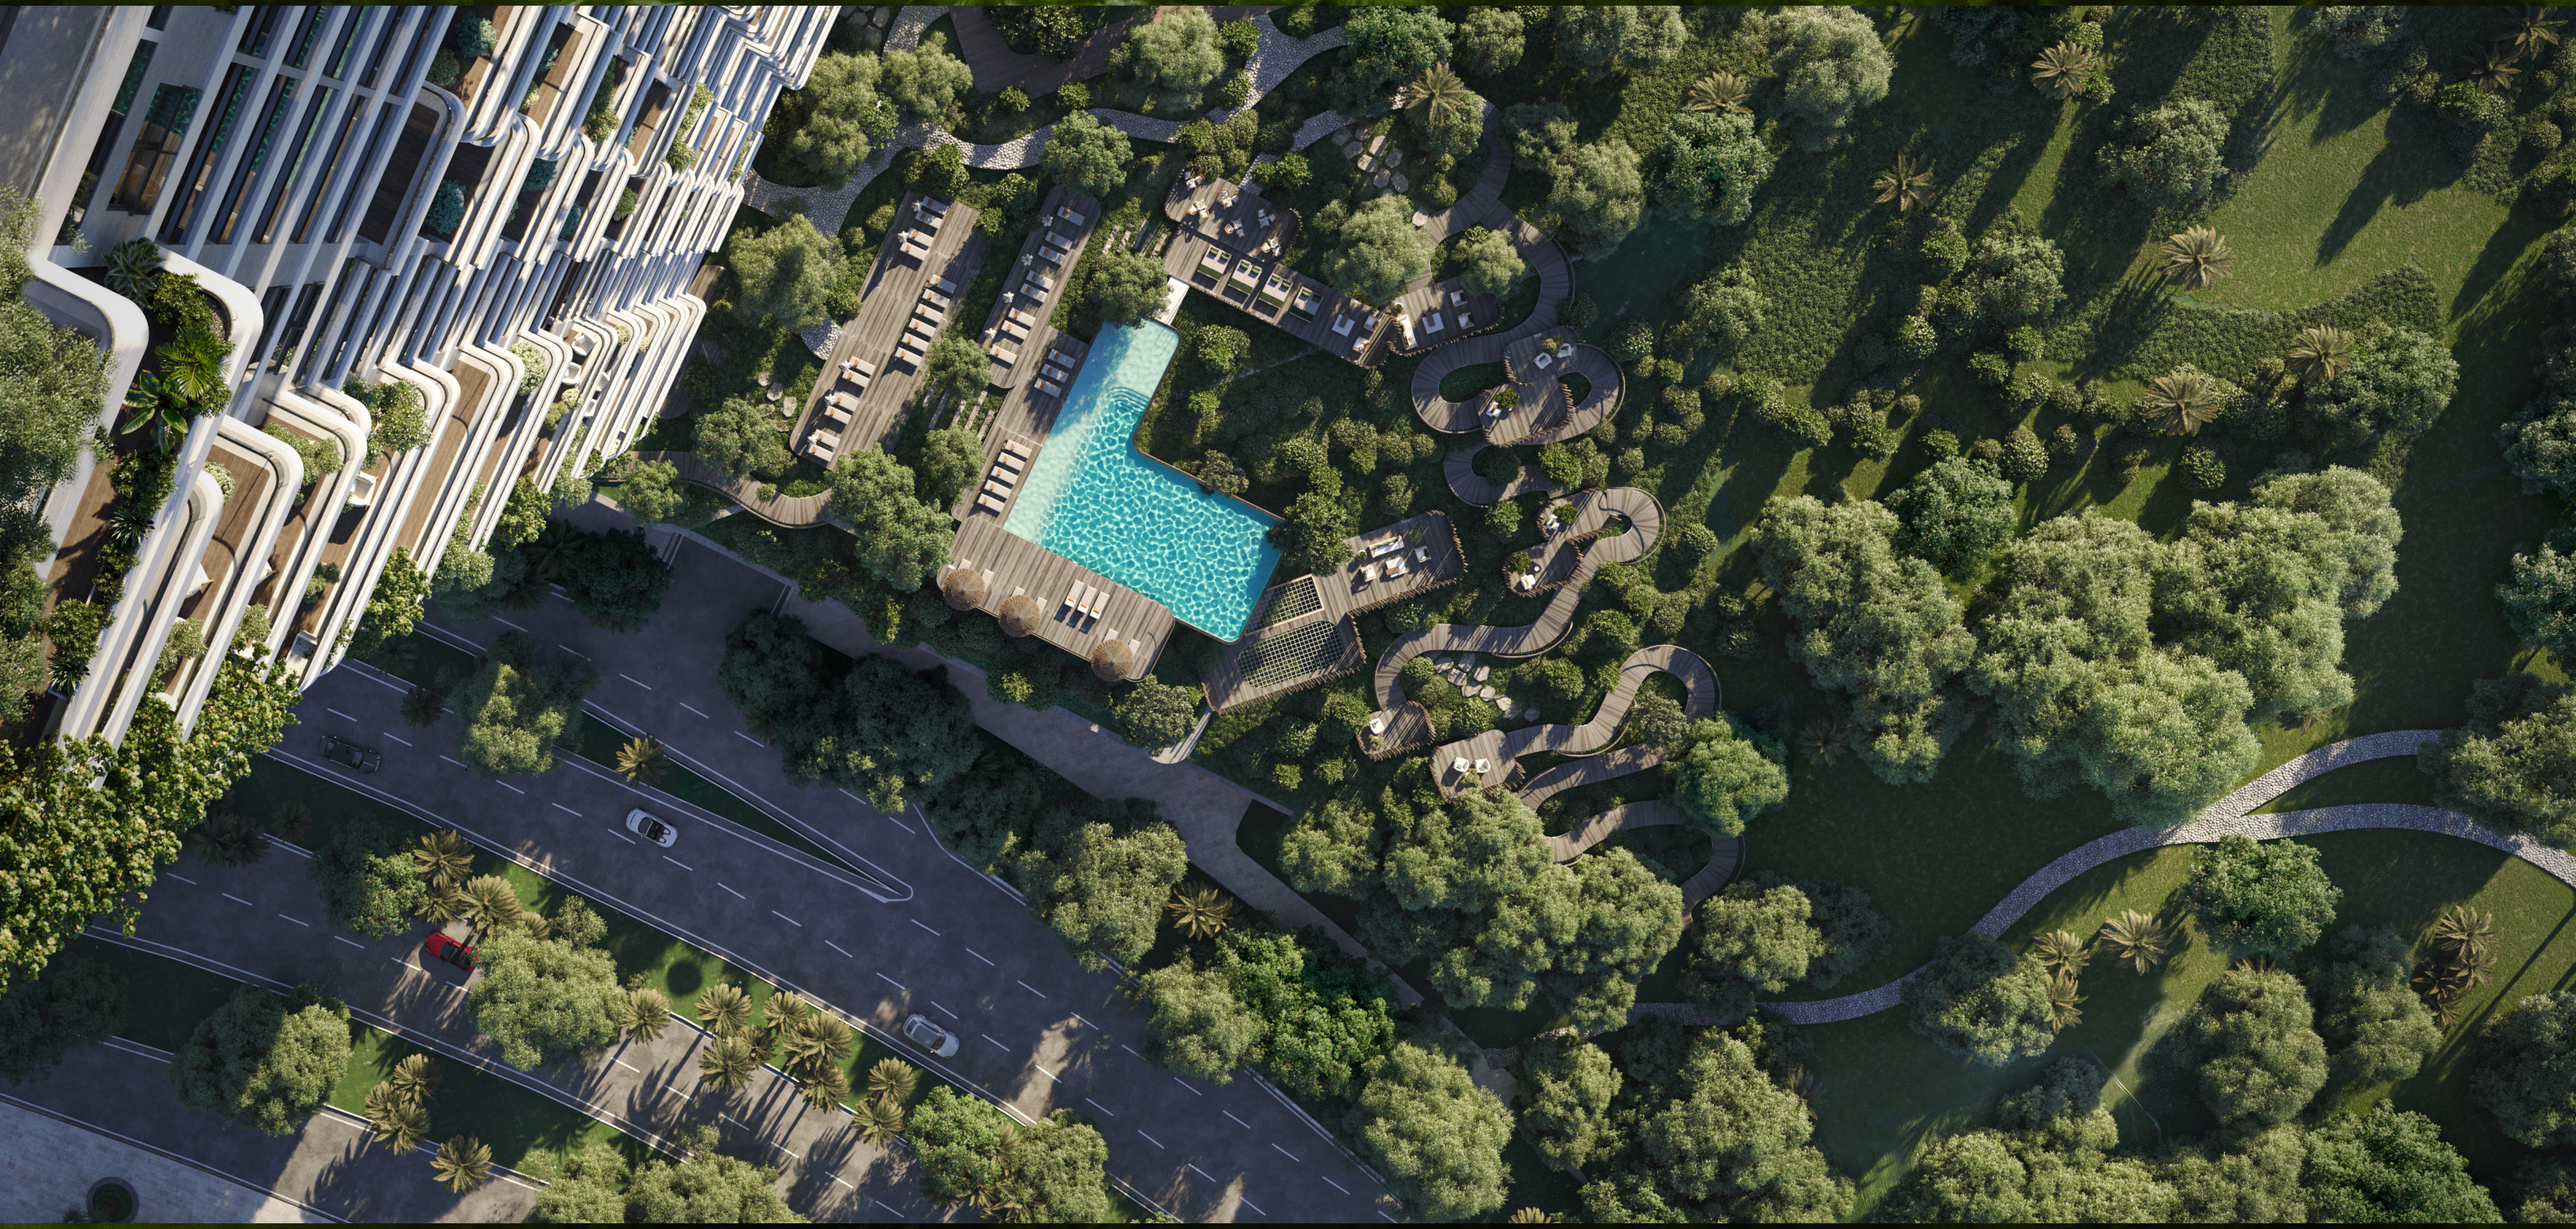
ESCAPE
INTO
NATURE

Talea is more than just a building, it is a living entity, where nature is not an accessory but an integral part of the architecture.



The floors of the tower are an extension of the landscape, where greenery climbs up the facades and the building breathes with the surrounding Forest. The structure seems to grow organically, from the podium on several levels up to the green terraces, blending perfectly with the environment.



Each leaf tells a story of peace.

TALEA

Every shape, every curve, every surface is designed to blend with the landscape.

The organic shapes of the design and the expansive glass façades create the sensation of living suspended between sky and earth, in perfect harmony with the lush greenery.

Biophilic design extends throughout, bringing plant beauty to every corner, in every space.

Biophilic design at Talea goes beyond aesthetics, promoting the regeneration of both body and mind. By incorporating natural elements, it creates spaces that reduces stress, boosts spirits, and enhances cognitive function, fostering a sense of calm and well-being.

The garden is a sanctuary where the beauty of greenery takes center stage.

A shaded pathway winds through various levels, offering an immersive experience at every turn. The trail connects the podium to the park, guiding you through unique, varied spaces. Treehouse seatings offer scenic views, inviting relaxation, and outdoor games provide additional opportunities for fun with the family.

A JOURNEY THROUGH THE FOREST

Wandering through the undergrowth, you're embraced by the cool shade of towering trees, their branches creating a natural canopy overhead. The diverse plant species around you create a symphony of textures and colors and each step reveals new special wonders.
